

Empathy Map

Working customer/user empathy map for the AI BlogNest project.

Team	AI BlogNest 2023	Team ID	6ab4ccd16f290be8a6b460f4
Project Name	aiblognest	Maximum Marks	4 Marks

Empathy Map

The template asks the team to understand a user through Says, Thinks, Does and Feels. No interview transcript or named persona was supplied, so this is a project-aligned working map rather than verified user research.

• I want an easy way to manage my blog content. • I want to create useful content efficiently. • I want AI assistance without losing control.	• How can I reduce repetitive content work? • Can one backend handle my blog operations? • I need secure access.	Working Persona: Blogger / Content Creator Role / User Type: Content-focused API consumer	• Creates and edits blog posts. • Uses authentication for protected operations. • May use AI generation and summarization.	• Wants efficiency. • Values convenience and secure access. • May feel more confident when common tasks are unified.

Design Insight

The map points toward a solution that reduces fragmentation between authentication, content management and AI-assisted tasks. These insights are inferred from the documented feature set and should be validated with actual users if user-research evidence is required.
