

Data Flow Diagram

High-level DFD for the documented AI BlogNest REST API.

Task	Due Date	Team ID	Assessment ID
Project Name	aiblognest	Maximum Marks	2 Marks

DFD Overview

The diagram follows the uploaded template concepts of external entities, processes, data stores and labeled data flows. It represents only the documented high-level API architecture.

Key Data Flows

Flow	Description
User → API Server	Authentication, blog CRUD and AI feature requests.
API → Auth / Blog Processing	Validated API operations and protected-route processing.
Blog Processing → MongoDB	User/blog data persistence and retrieval.
AI Processing ↔ Gemini	Topic/content sent for generation or summarization and AI result returned.
API Server → User	JSON API responses containing results or errors.
