

Coding & Solution

Completed project assessment document

Date	15 March 2026	Team ID	6ab4ccd16f290be8a6b460f4
Project Name	aiblognest	Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	Not provided in uploaded files
Programming Language(s)	JavaScript / Node.js
Framework(s) Used	Express.js; Mongoose for MongoDB integration
Key Features Implemented	User registration/login; JWT-protected routes; profile endpoint; blog CRUD; Gemini AI blog generation; AI summarization; MVC architecture
Pending / Incomplete Features	No pending features are explicitly identified in the supplied documentation. Execution-level verification is not available.
Setup / Run Instructions	Copy .env.example to .env; configure PORT, MONGO_URI, JWT_SECRET, GEMINI_API_KEY and GEMINI_MODEL; run npm install; run npm run dev.

Documented API Coverage

Area	Endpoints / Functionality
Auth	POST /api/auth/register; POST /api/auth/login; GET /api/auth/profile
Blogs	POST /api/blogs; GET /api/blogs; GET /api/blogs/:id; PUT /api/blogs/:id; DELETE /api/blogs/:id
AI	POST /api/ai/generate-blog; POST /api/ai/summarize

Code Quality Checklist

S.No	Criteria	Status	Remarks
1	Code is modular and organized into functions / classes	Yes	MVC architecture is documented.
2	Meaningful variable and function names are used	Partial	Cannot verify source-level naming from supplied files.
3	Code includes comments / documentation where necessary	Yes	README and API collection document the solution and endpoints.
4	Error handling is implemented for critical operations	Partial	Implementation is not directly verifiable from the supplied files.
5	The application runs without critical errors	Partial	Run commands and dependencies are documented, but no execution result was supplied.
6	Code is committed to a version control repository	Partial	A repository URL was requested by the template but was not supplied.

Additional Notes / Comments

The uploaded documentation describes a RESTful AI blogging backend. The package configuration includes Express, Mongoose, JWT, bcrypt, express-validator, dotenv, Morgan and Google Generative AI dependencies. The supplied Thunder Client/Postman collection covers authentication, profile, blog CRUD, AI generation and summarization requests.
