

No. of Functional Features Included in the Solution

Completed project assessment document

Date	15 March 2024	Team ID	6ab4ccd16f290be8a6b460f4
Project Name	aiblognest	Maximum Marks	5 Marks

Functional Features Overview

The following features are derived from the uploaded README and API collection. Status is marked Done where the functionality is explicitly documented and represented by an API endpoint/request.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks
1	User Registration	Create a user account through the authentication API.	Authentication	Done	0.625
2	User Login	Authenticate a registered user and obtain authentication credentials.	Authentication	Done	0.625
3	JWT-Protected Profile / Routes	Access the user profile and protect operations with a Bearer token.	Authentication	Done	0.625
4	Blog CRUD	Create, read, update and delete blog posts.	Blog Management	Done	0.625
5	AI Blog Generation	Generate blog content from a supplied topic using Gemini AI.	AI Integration	Done	0.625
6	AI Summarization	Generate a short summary from supplied blog content.	AI Integration	Done	0.625
7	MongoDB Data Persistence	Use MongoDB through Mongoose as the documented data layer.	Database / Storage	Done	0.625
8	REST API Integration / Testing	Expose documented REST endpoints and provide Thunder Client/Postman request definitions.	API / Integration	Done	0.625

Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8 documented
Core / Must-Have Features	Authentication, protected routes, blog CRUD, AI generation, AI summarization
Additional / Nice-to-Have Features	No additional features are explicitly identified in the supplied documentation.
Features Tested & Verified	API request definitions are supplied; actual execution results are not supplied.

Feature Category Breakdown

S.No	Category	Features in Category	Example Features / Technology
1	User Interface (UI)	No UI is documented in the supplied backend project files.	Not documented
2	Backend / Logic	Authentication, blog CRUD and AI processing endpoints.	8 functional areas documented
3	Database / Storage	MongoDB with Mongoose is documented as the data layer.	MongoDB / Mongoose
4	API / Integration	REST API endpoints plus Thunder Client/Postman collection.	Auth, Blogs and AI APIs
5	Security / Authentication	JWT protection and bcrypt are documented.	Registration, login, protected routes
