| Date         | 15 March 2026 | Team ID       | 6ab4ccd16f290be8a6b460f4 |
| Project Name | aiblognest    | Maximum Marks | 1 Mark                   |

## Demonstration of Proposed Features

The feature list below is grounded in the supplied README and API testing collection. Features explicitly documented by the project are marked Implemented; live demonstration status should be confirmed during the actual demo.

| ID | Feature Name                    | Description                                                               | Status      | Demonstrated | Remarks                                                                    |
|----|---------------------------------|---------------------------------------------------------------------------|-------------|--------------|----------------------------------------------------------------------------|
| 1  | User Registration               | Create a user account through POST /api/auth/register.                    | Implemented | Yes*         | API request is included in the supplied testing collection.                |
| 2  | User Login & JWT Authentication | Login and use JWT-protected routes/profile access.                        | Implemented | Yes*         | Login/profile workflow is documented and included in the collection.       |
| 3  | Blog CRUD                       | Create, read, update and delete blog posts.                               | Implemented | Yes*         | CRUD endpoints are documented and represented in the testing collection.   |
| 4  | AI Blog Generation              | Generate blog content from a supplied topic using the Gemini integration. | Implemented | Yes*         | POST /api/ai/generate-blog is included in the testing collection.          |
| 5  | AI Summarization                | Summarize supplied blog content using the AI integration.                 | Implemented | Yes*         | POST /api/ai/summarize is included in the testing collection.              |
| 6  | MongoDB Data Persistence        | Persist application data using MongoDB/Mongoose.                          | Implemented | Yes*         | Documented in the README; live database demonstration should be confirmed. |

## Feature Implementation Summary

| Metric                          | Value |
|---------------------------------|-------|
| Total Features Proposed         | 6     |
| Total Features Implemented      | 6     |
| Total Features Demonstrated     | 6*    |
| Overall Implementation Rate (%) | 100%  |

\* Demonstration status is based on the documented/testable feature set; actual live demonstration evidence was not supplied. The implementation rate refers to documented implementation, not live-demo verification.
